About Me

I'm a positive, precise web developer with expertise creating user-friendly, responsive websites and web apps. I enjoy converting challenging issues into clear, effective code using my expertise in HTML, CSS, JavaScript, and contemporary frameworks like React. Additionally, I understand database administration, API integration, and backend technologies. I'm constantly willing to learn new things and get better, and I work best in groups where I can help build unforgettable digital experiences.

SKILLS

- HTML/CSS
- Frontend Frameworks
- Debugging and Problem Solving
- Backend Development
- Web Performance Optimization

EDUCATION

- Bachelor of Science in Information Technology
2015-2019

WORK EXPERIENCE

June 2022 – Present

Seek Social Ltd

Frontend Developer

- Designed and developed custom landing pages and e-commerce interfaces using Bootstrap and jQuery.
- Worked closely with graphic designers to translate designs into functional, cross-browser web pages.
- Used Git for version control and collaborated with backend teams via RESTful APIs.
- Improved mobile responsiveness and accessibility on multiple projects.

Oct 2019 – March 2022

STARKS Industries

Web Development Intern

- Assisted in developing internal tools and dashboards using HTML, CSS, and basic JavaScript.
- Fixed layout bugs and implemented UI updates under senior developer supervision.
- Gained experience with Git, Chrome DevTools, and basic SEO practices.
- Successfully delivered two mini-projects as part of the internship assessment.
